Press Release - January 2010 - 2 pages RF FINAL DRAFT

IXOS LAUNCHES DIVO SPEAKER SYSTEM - £229.99

- **An extremely versatile 2.1 TV upgrade & stereo music system with dock for iPod™**
- **Multi-purpose design for modern usage patterns - www.ixos.com/divo**

At IXOS our design and development process concludes with subjective evaluation because ultimately, it's the listening that counts. How does the system perform? How detailed and natural is the sound? These are the questions we ask in order to verify our research.

Bringing 15 years of experience and innovation to the table, the IXOS Divo 2.1 is a multi-purpose design, that has been developed to fit modern usage patterns and to achieve two goals:
a. To markedly upgrade the sound quality from any TV set and b. To work seamlessly with iPods, MP3 players and computers. The Divo provides the versatility to adapt to any lifestyle usage and the smart styling and separated component parts allow it to fit in almost anywhere.

TV Sound upgrade

As TV's become slimmer the sound quality has deteriorated. A Divo can upgrade the sound from a TV by simply connecting the TV's audio output to the Divo stereo phono inputs. The size and style of the Divo speakers are a neat match to today's flat TVs and modern homes.

iPod, laptop, MP3 player, desktop sound

As well as the Divo bringing new life to iPod and iTunes music, the 3.5mm auxiliary input allows connectivity with nearly all portable music devices, laptops and computers.

Delivering proper stereo

The Divo's mini-tower speakers can be situated at a distance from the separate subwoofer for wide stereo separation. The result is more realistic music reproduction and a much wider sound field, than with one-box iPod docking speakers or indeed any one-box system.

IXOS® PC-OFC cables

IXOS guarantees the highest performance by supplying award-winning IXOS® cables with the Divo. Two lengths of speaker cable (4.5m and 0.5m) allow set up in a variety of living spaces.

The Divo 2.1 music system is a truly versatile and unique product, ideal for those who demand high quality sound reproduction and desire to combine several audio sources (TV / iPod / CD Player / Games Consoles / Laptop) through one convenient sound system.

CONNECTING SCIENCE TO PERFORMANCE™

**IXOS DIVO SPEAKERS
- 2.1 music system**

Key Features:

- IXOS® designed high quality stereo music system with subwoofer
- Universal iPod dock, plays, charges and synchronises with a computer's iTunes library
