Houston, we have
a sound system

IXOS Divo

£230 | www.ixos.co.uk

In space, no one can hear your home cinema scream. That is unless you have an IXOS Divo system and turn it up loud enough to blow the rings off Saturn. A sci-fi space station aesthetic pulls it out of the orbit of most 2.1 speaker setups and 48W of sound-pushing output should make it roar with more power than a lion being launched to the moon. Throw in an iPod dock and you've got a bit of kit that NASA would be proud of.
