## Ios delivers Divo 2.1 speaker system for TV, PC or iPod

TODAY

Ooh, we like the look of this stylish 2.1 speaker system from Ios, the £230 Divo.

The Ios Divo 2.1 is designed for use with TVs, PCs, games consoles, iPods or MP3 players. It can be added to a flatscreen TV to boost its sound, or as an iPod dock that will charge your iPhone/iPod and sync with iTunes via USB.

But it isn't just for iPods: stereo phono and a 3.5mm inputs mean that it can be connected to almost any audio source, boosting the sound via its 'mini tower' stereo speakers and separate subwoofer.

Key technical features include:

- Universal iPod dock
- Plays, charges and synchronises with a computer's iTunes library
- 'Acoustic Air Spring' passive radiator subwoofer
- Audio cables engineered by IOS
- 3.5mm auxiliary input for laptops and portable music devices
- Stereo phono inputs for CD/DVD players and TV audio outputs
- System remote control with iPod functionality
- System frequency response: 20Hz to 20kHz
- Total system power (RMS): 48 Watts
- Speaker drivers: 2 x 50mm midrange, 1 x 15mm tweeter
