Ixos Divo iPod dock

The Ixos Divo isn't just an iPod dock, it can also upgrade your TV soundsystem.

The Ixos Divo is a 2.1 soundsystem that will not only pump out music from your iPod, but your TV as well.

It features two satellite speakers and a sub-woofer, capable of pushing out 48 Watts of sound in total. When your iPod is sat in its dock you can sync it with your PC thanks to the USB port and it'll even keep it charged up as well.

It's also been designed with TVs in mind, so if you hook it up to your telly box as well you should enjoy better audio from your favourite shows.

The Divo is available now for £229.99, see [Ixos](#) for more information.
